# Our Mission

**We believe** that a positive and creative work environment will lead to a quality product.

**We believe** that it is our responsibility to provide our customers with T-shirts that are printed with environmentally sound materials.

**We believe** that customer satisfaction is one of the most effective measures of our success as a company.

## Did you know that most T-shirts you buy at stores are actually toxic?

It's true. The dyes used to color the T-shirt you may be wearing right now are made from chemicals that are highly poisonous to the environment. Infectious Tees uses a water-based dye on our T-Shirts that's permanent, safe, and non-toxic. It's not that difficult to do your part to save the environment.
